World of airports guide

Some countries are more accessible than others. The passport situation plays an important role. But so is the option of actually getting to the country in question. For example, Americans can catch flights to many European attractions. But one of the biggest challenges for travellers? Like all these wonderful destinations, I try to visit countries without airports. One mountain country hidden in Europe is worth a difficult trip (page 9). 1. Monaco Monaco | OSTLJi/Stock/Getty Images Location: European Language: French Monaco is the second smallest country in the world, according to Reader's Digest. So it's no surprise that France, a wealthy city-state on the Mediterranean coastline, lacks airports. Lonely Planet has called Monaco a magnet for high-rollers and hedonists since the early 20th century. You can also tell it as a tax haven or home to the Formula One Grand Prix. To visit the small country, you need to take a 25-minute drive from Monaco to France's Nice East Sea international airport. Next: This state has declared independence, but there are no working airports. 2. Asak Nagorno-Karabakh Republic (Asak) Republic | Konstantin Novakovic/Stock/Getty Images Plus Location: in the South Cccasus between Eastern European and West Asian languages: Armenian Arsak Republic, formerly known as Nagorno-Karabakh Republic, a country with limited awareness in the Southern Cccasus. (Although it has declared independence, it is internationally recognized as part of Azerbaijan, which is disputed with the Armenian ethnic majority in Armenia and Asak.) Artsakh technically has an airport in Stefanocutt. But no one has been in it since 1992. Next: This gorgeous secluded area is only accessible by boat. 3. Pitcearn Islands | Tourism in the Pitcearn Islands via Facebook location: In the South Pacific language: The English and Pitcearn Islands consist of four volcanic islands that make up the last British overseas territory in the South Pacific. The Telegraph says it is famous for being settled by HMS Bounty's Mutini. But the region's population has declined for decades, and as of 2015, authorities had counted less than 50 people living on Pitcown, the region's only inhabited island. Pitcown has no airports or airfields. It is only accessible from the sea. Next: There were four airports in the state until the border was scrambled. 4. Palestinian Village near Silwan, Jerusalem | rglinsky/Stock/Getty Images Plus Location: Middle Eastern Language: Arabic Palestine is a state technically de-given that claims the West Bank and Gaza Strip, and use East Jerusalem as its capital. However, Israel has occupied much of the Palestinian-claimed area since the 1960s. In fact, there were once four airports within the Palestinian territories, but all Fortunately, Israel's Ben Gurion International Airport is just 16 miles from Bethlehem. Next: The territory has embarked on more than a day's journey from its closest neighbor. 5. Tokelau's View of Mount Tokelau | Mifsunubi/Stock/Getty Images Plus Location: South Pacific Language: Tokola and English New Zealand's subordinate territories, this island nation consists of three far-off coral atolls, Atapu, Nukunonu, and Pacaopo. Located between New Zealand and Hawaii, Tokelau has few physical links to the wider world, the BBC explains. There is no airport and it takes more than a day to reach its southern neighbor, Samoa. More than 1,500 islanders rely on livelihood farming to survive, and Tokelau's main industry is fishing. Next: There is an identity crisis in the region, and there are no airports. 6. Transnistria Tiraspol, capital of Transnistria | Pe3check/Stock Editorial/Getty Images Plus Location: Between Moldova and Ukrainian Studies: Russian, Moldovan, Ukrainian Transnistria goes by many names, including the preferred Friednestrobian Moldavian Republic. Wired is characterized by thin strips of land wedged between Moldova and Ukraine and traps all of the independent countries - but [it's not] that. The airport-free territory declared independence from Moldova in 1990, establishing a socialist republic and wishing to remain in the Soviet Union. Since then, neither Moldova nor Russia has recognized Transnistria's independence (nor has the United Nations). Next: This beautiful little country in Europe is a short distance from the Italian airport. 7. Fort San Marino Gya and San Marino City Infograficki/Stock/Getty Images Plus Location: Within the northern Italian language: Italian surrounded by Italian land, San Marino is one of the oldest republics in the world, dating to 301 AD. It is also the fifth smallest country in the world and the sole survivor of Italy's network of ancient city-states. San Marino has no airport. However, Reader's Digest reports that it is located nine miles from Federico Fellini International Airport in Rimini. Next: Morocco had nothing to do with this partially recognized condition. 8. Sarawi Arab Democratic Republic Flag | Domaeginting/Stock/Getty Images Plus Location: Western Sahara Language: Arabic and Spanish sarawi Arab Democratic Republic, a partially recognized state, controls the territory of Western Sahara. Join the list of countries (and territories) without airports. The state was a former Spanish colony, and Morocco annexed in 1975, the BBC reported. Since then, it has remained the subject of disputes between Moroccan and indigenous Sarawi people. Next: This mountainous country is hard to get to, but it's worth a trip. 9. Andorra Encamp, Andora | iStock.com/ã The airport is scarce. Sitting in the Pyrenees valley means it's difficult to build an airport runway, so visitors can reach it via Spain or France. The closest airport to the capital of Andorra is Girona Costa Brava Airport in Spain, but you can also travel through Toulouse, France or Barcelona, Spain. Cultural travel notes andora is not part of Europe or the eurozone, even if it uses the euro. Next: This fairy tale comes to life and lacks its airport. 10. Lichtenstein Balgers Village | RossHelen/Stock/Getty Images Plus Location: Official European Language: The German BBC describes the Principality of Liechtenstein as a small, dual-glazed country nestled between Switzerland and Austria, with mountain views rising over the Rhine Valley. Lonely planets say fairy tales come to life in small, wealthy countries. It has a castle, a mountain, and an iron-willed monarch. What's the only thing it doesn't have? Airport. Reader's Digest reports that to reach Liechtenstein, you must pass through St. Gallen-Altentrin Airport in Switzerland, 15 miles away. Next: There are no airports in this disputed area. What's more, the border with one of the neighbors is closed. 11. South Ossetia River Cassani, Cccasus Mountains, South Ossetia | Zmij/Stock/Getty Images Plus Location: South Cccasus Languages: Ossethian, Russian, Georgian and then without their airports on the list of countries (and territories)? Southern Ossetia, a disputed region in the southern Cccasus. South Ossetia is officially part of Georgia and is separated from Russia's northern Ossetia region by the high border of the Kocassus Mountains, the BBC reported. The territory has remained a source of tension since the dissolution of the Soviet Union and even hosted the 2008 war between Russia and Georgia. South Ossetia depends on the aid of Russian forces. There is no airport and the border with Georgia is closed and you have to travel to Russia to get there. Next: This small country in Europe does not have its own airport. It doesn't even have room for them. 12. Piazza San Pietro in Vatican City | Banake/Stock/Getty Images Plus Location: Within the City of Roman Studies: Despite Vatican City being a city-state, Italian fortunately - technically like his own country - it's not really that hard. Reader's Digestnote, 109 acres of state is located within the city of Rome. With the smallest state in the world, both local and population, it does not have its own airport. But as many Americans who have traveled to Italy can tell you, you won't have a hard time booking a trip to Rome or finding your way to Vaican City. Next: It's rare to not have an airport. But what about having only one? How many countries have one airport? Central African Equatorial Guinea | Jan Ziegler/Stock/Getty Images Plus 12 countries and territories around the world lack airports. It shows that most places in the world are pretty well connected. And it's very rare that there are no airports within our borders at all. But you can't just say the same thing at one airport, especially in a small country. It might be hard to imagine if you've lived most of your life in the U.S., but there's only one airport in the world. Don't you believe us? Check out this list for yourself: Equatorial Guinea, Sao Tomé, Principe, Burundi, Comoros, Mauritius, Reunion, Rwanda, Seychelles, South Sudan, Uganda, Djibouti, Eritrea, Chad, Lesoto, Mayote, Swaziland, Benin, Central African Republic, Ivory Coast, Gambia, Guinea, Liberia, Mali, Niger, Sierra Leone, and Togo to: There is only one angilla airport in the Americas | Danilforcellini/Stock/Getty Images Plus you don't even have to leave the Americas to find countries and territories that have a single airport to serve their entire population, as well as all tourists who want to travel by air to discover what their country has to offer. The Americas include Angulla Antigua and Barbida Barbados Dominican Barbaros Dominican Grenada Guadeloupe Martinique Montserrat St. Barcerat Saint-Barceremi Saint-Kiz and Nevis St. Lucia Turks, Caicos Islands Belize El Salvador Bermuda Falkland Islands French Guiana Guyana Surina Neid: Asia, and many other countries. Surprisingly, many Asian and Middle Eastern countries also have one airport: Pyongyang and North Korea | Kim Won-jin/AFP/Getty Images It's easy to think of Asia as part of a world very well connected to everything else. But in reality, you can find many Asian countries with a single airport that serves all citizens and visiting travelers, not just Middle Eastern countries. In Asia, countries with only one airport are North Mongolia Hong Kong Macau Bhutan Brunei Southwest of Singapore and in the Middle East, Bahrain Kuwait Lebanon Qatar Next (Bahrain Kuwait Lebanon Qatar Next: More than a few places in Europe) also have only one airport. There is a single airport in several European countries and territories, as well as Gibraltar | Marcelina1982/Stock/Getty Images Plus interestingly, a number of European countries and territories also fall on the list of just one airport location to serve their residents and tourists who decide to plan their location within their borders. In Europe, there is a country and territory with only one airport: Gibraltar Guernsey Jersey Man Luxembourg Albania Kosovo Malta Moldova Faroe Islands Next: In Oceania, many places arrive at one airport. Oceania has one airport Christmas Island and numerous countries and territories | Killedabi/Stock/Getty Images Oceania is also home to a variety of countries and territories, each with its own airport. For many, it makes no sense to have multiple airports, given the small chunks of land and the remote nature of the islands that make up the island. In Oceania, there is only one airport and country and territory included: Christmas Island Cocos Cook Island Easter Island French Polynesia Guam Nauru New Caledonia Norfolk Island Nieuw Palau Papua New Guinea Samoa Solomon Islands Tuvalu Read more: These are countries that have national airlines (and why the US doesn't) check out the cheat sheet on Facebook!
